STATEMENT

CSM Wireless, LLC and its affiliated licensees listed on the transmittal letter herewith (collectively, "CSM") is a provider of Commercial Mobile Radio Service ("CMRS"). It does not offer telecommunications services to its customers in categories other than CMRS. CSM does not currently use customer proprietary network information ("CPNI") for internal marketing purposes or share CPNI with affiliates or with third parties, other than pursuant to requests by duly-authorized law enforcement officials. Consequently, CSM is not required to and does not maintain either an "opt-in" or "opt-out" system with respect to CPNI. In the event that CSM were to change the ways in which it uses CPNI, any such change would be reviewed and approved by the company's CEO, who is familiar with the FCC's rules governing the use of CPNI and who is the certifying officer for CPNI purposes.

CSM has established procedures to maintain the security of CPNI of its customers. For example, CSM maintains all CPNI on a secure server using a proprietary database, and CPNI is accessible only to select, specially-trained employees within CSM's call center and network operations group. CSM representatives will discuss customer account information only after a caller has presented unique identifying information establishing that the requesting party is, in fact, the subscriber whose records are requested. CSM provides call detail records only to customers who make an in-person request in a CSM store and present valid identification, or to law enforcement officials who present a valid subpoena. The CSM employee handbook expressly prohibits the divulgence of any confidential customer information, and provides for immediate punishment upon a violation of this prohibition, up to and including termination of employment.
